Let me share with you what one of my Clients has told me:

Lisa says her hair turns Brassy very quickly only 2 week after having her hair done and she usually goes every six week.

But now every time she uses toner at home using my tips she goes to work and her friends always say " Did you get your hair done last night?"

She said "No. I'm very proud of myself because I DID IT myself at home". Her friends are very surprised

And now

She gets her hair done every three months, not every six weeks
